
Requirements for stencil templates

1. Paper artworks

- Manufacturing of stencil sizes up to 1000 x 400mm (39x16") possible
- Charge for reproduction and stencil only
- (eventually charge for photostat)

Paper artwork should comply with following requirements:

- Contour sharply defined (sharp to print), otherwise additional charge for manual amendments (modification works)
- Min. line thickness has to be 0.15 mm (0.006"), otherwise additional charge for modifications

2. Film artworks

- Charge incurred for stencil only, i.e. no additional charge for repro-, photostat- or for retouch works

Film artwork should comply with following requirements:

- Side of coating on top
- Line thickness has to be min. 0.15 mm (0.006")
- Film artwork has to be in original size in scale 1:1
- Layout of film artwork according to layout of stencil
- Contour sharp defined Film artwork (sharp to print)

3. Digital Artworks in form of file for Computer

- Charge for reproduction and stencil only

Data transmission possible in two ways:

- A by floppy disc or CD-Rom
- B by data remote transfer via Modem (Email)

Prefer following formats for data transmission:

- Used operating systems: XP, VISTA, 2000, WINDOWS 98, MAC
- To create the films for exposure we are working with a customized CorelDRAW Graphics Suite X3 Software version, „cdr“ format

Preferred formats:

- Encapsulated Post Script format „.eps“ as curve respectively vector graphic
- Tiff Bitmap „.tif“ format as curve respectively vector graphic
- Other file formats have to be converted respectively exported to „.eps“, „.tif“ or „.bmp“ formats before transmission to our eMail address stencilservice@Schilling-Marking.de
- This is also possible with other operating systems e.g. such as MACINTOSH.

Other formats possible on request
